

# Fig. 318L/418L Lightweight Manhole

## Specification Sheet

The 318L/418L Series consists of large diameter lightweight manholes used in service stations, truck stop drives and other locations.

Each manhole cover is engineered laminate and is both slip and fire resistant. The covers are shipped with a stainless steel handle that has a key and hand lift. A pryplate is standard on both the 318L and 418L.

The skirt is 12 gauge steel and the ring is 3/16" steel. Assembly painted black.

The 418L bolts are 3/8"-16 Stainless Steel. The gaskets are 1" x 1/8" EPDM Foam. The bolt down version is water resistant.

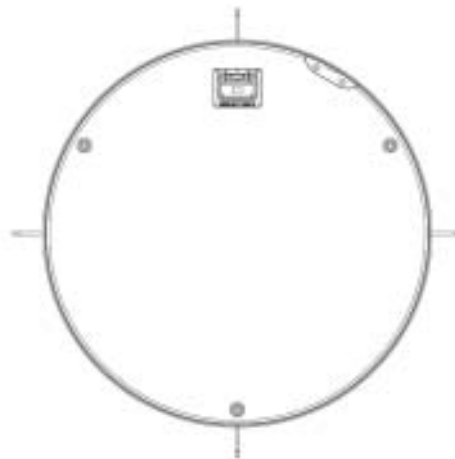

The manhole series was tested by an official testing laboratory and results confirm their use and performance to meet the following:

1. Section 206-3 of American Public Works Association (Adopted by the Los Angeles County Department of Public Works)
2. AASHTO standard for "H-20" truck loadings

Testing was witnessed by an official from Los Angeles County of Public Works. Test results and other technical data is available from Morrison Bros. Co. upon request.

318L Manhole With Stainless Steel Handle & Pryplate

418L: Bolt-down Version

318L: Non-Bolt-down Version
