

Fig. 184 Series Bushings & Plugs

Specification Sheet

SPECIFICATION OPTIONS:

Double Tapped Bushings are used in pipe and tank fittings to reduce or adapt connections. The outside threads are male. The inside threads (threaded from the top and from the bottom) are female.

Fig. 184S Double Tapped Bushings are the same as Fig. 184 except they are constructed of stainless steel.

Fig. 184 Series Bushings & Plugs

The Duplex Bushings (Fig. 184D) are used to convert a single tank opening to dual threaded openings. One opening is single tapped and the other is double tapped.

The Quad Tapped Bushings (Fig. 184Q) are similar to the Duplex Bushings except both female openings are threaded from the top and threaded from the bottom.
