

MBC Receives CARB EVR Approval

Morrison Bros. Co. has received approval from California's Air Resource Board for a Phase 1 Enhanced Vapor Recovery System for Protected Aboveground Storage Tanks. Executive Order VR-402-A is posted on ARB's website.

CARB requires installers in California to be certified by Morrison Bros. Co. prior to installing any EVR approved storage tank equipment. Visit our new website (www.morbros.com) and click on the CARB Certification tab. Our new CARB certification portal makes it easy to register, review the installation document and videos, and follow the installer certification process.

The Morrison Bros. Co. EVR Products Brochure and EVR Price List are posted on our website. The complete price list has been updated to include these items and is also available on our website. You'll find many of the EVR models are priced the same as our non-EVR products!

Morrison Bros. Co. Launches New Website

Morrison Bros. Co. launched its new website on July 1. In addition to the exciting new look, the new website is user-friendly and packed full of important information about our products, pricing, new CARB certification, and much more! Our new search feature makes it easy to find products, specification sheets, and installation instructions.

The "What's New" section provides visitors with the most up-to-date information about Morrison Bros. and our latest products.

Visit our new website today at www.morbros.com.

Morrison introduces the 9095C!

We've added a new member to the 9095 valve family! The 9095C Morrison Overfill Prevention Valve is designed for use on low profile top loading aboveground storage tanks and tanks that require a high level shut-off. Maximize your allowable storage capacity with the 9095C!

[Click here](#) to get details and pricing on the 9095C on our new website!
