

July 15, 2011

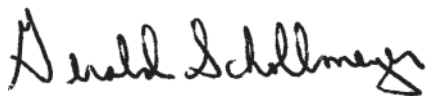

Morrison Bros. Co. has received approval from California's Air Resource Board for a Phase 1 Enhanced Vapor Recovery System for Protected Aboveground Storage Tanks. Executive Order VR-402-A will be posted on ARB's website within the next few days.

CARB requires installers in California to be certified by Morrison Bros. Co. prior to installing any EVR approved storage tank equipment. Visit our new website at www.morbros.com and click on the CARB Certification tab. Our new CARB certification portal makes it easy to register, review the installation document and videos, and follow the installer certification process.

The Morrison Bros. Co. EVR Products Brochure and EVR Price List are attached for your reference. The complete price list has been updated to include these items and is available on our website (<http://www.morbros.com/literature/download-literature>). You'll find many of the EVR models are priced the same as our non-EVR products!

Product & Price List Notes:

- The 2-inch 244OM Series Emergency Vents are now available in aluminum and with a 16 ounce per square inch pressure setting.
- The 3-inch 244OM Series Emergency Vents are now available with a 16 ounce per square inch pressure setting.
- The 4-inch 16 ounce 244O Series Emergency Vents List price has been reduced.
- All EVR 419 Series drop tubes are individually boxed.
- 818 Clock Gauge List Prices have been reduced and are priced the same as the EVR models.
- The EVR model of the 918 clock gauge does **not** include the alarm. The gauge and the alarm must be ordered as two separate line items.
- The 3-inch 9095A List Price has been reduced.
