Attention: Morrison Distributor

Subject: Fig. 818 & Fig. 918 Clock Gauge Floats

Morrison Bros. Co. announces a new style float for our clock gauges. Our Fig. 818 Series and Fig. 918 Series Clock Gauges are currently supplied with a Drop Tube Style float that hangs vertically in the product. On Monday, April 27th, we will be changing to a Barbell Style float that hangs horizontally on top of the product. Please see the pictures of both float styles below.

Old Float Style
818---0445 AF

New Float Style
818---4045 AF

We have found that the horizontal Barbell Style float is capable of providing more accurate readings in all products, especially products with lower relative densities. It also provides more accurate readings at the very bottom of the tank when the vertical Drop Tube Style float would contact the tank bottom.

While this Barbell Style float will be our standard float, we will continue to offer the vertical Drop Tube Style floats as an option.

The following list shows the figure numbers of the floats. Please be sure to make note of this in your Morrison Price List.

Fig	Suffix	Size	Description	Weight	List Price
818	0100 AG	2"	Clock Gauge w/Standard Float	4.5	\$446.29
818	0400 AG	2"	Clock Gauge w/Drop Tube Float (Float Fits 2" Schd.40 & 80 Pipe & 2" MBC 419 Drop Tube)	4.5	\$446.29
818F	0100 AG	2"	Clock Gauge - Female Thd. w/Standard Float	4.5	\$446.29
818F	0400 AG	2"	Clock Gauge - Female Thd. w/Drop Tube Float (Float Fits 2" Schd.40 & 80 Pipe & 2" MBC 419 Drop Tube)	4.5	\$446.29
